## INTERNATIONAL STUTTERING AWARENESS DAY OCTOBER 22ND

Since 1998, every year on October 22 we celebrate ISAD. Isn't this an excellent joint project between ISA, IFA, ASHA Division 4 and ELSA? Haven't we already accomplished a lot together?

Self-help groups and the national associations become very active and creative when International Stuttering Awareness Day approaches. The Stuttering Homepage is the home of the regular online conferences on stuttering every October 1 to 22. There is big media coverage in many countries. People who stutter from self-help groups as well as professionals are interviewed for TV and newspapers. Excellent projects, interesting discussions and parties occur around the World around October 22. It is so gratifying to see how the national associations use this Day for working and celebrating. Isn't International Stuttering Awareness Day an excellent model for further future cooperation of the stuttering community together with professionals.

## A VOICE AND SOMETHING TO SAY

### Online Conference --- October 1st - 22nd

The International Stuttering Awareness Day (ISAD) online conference is hosted by Judith Kuster, emeritus professor, Minnesota State University, Mankato. The conference represents a world-wide endeavor by persons who stutter, their friends and families, students, and professionals (educators, researchers, and clinicians) interested in stuttering.

The conference consists of a variety of papers written by professionals as well as people who stutter. Papers are written in a reader-friendly style with threaded discussions attached for interaction between the presenters and participants for three weeks. All papers remain available online after the conference begins on October 1 and concludes on October 22. Past online conferences are freely available on the Conference Archives (<http://www.mnsu.edu/comdis/kuster/isadarchive/onlineconference.html>).

The conference is FREELY AVAILABLE and linked to the Stuttering Home Page website (<http://www.mnsu.edu/comdis/kuster/stutter.html>) starting October 1.
